DETAILED ACTION

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claim 1 – 26 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1 - 78 of copending Application No. 10/012,002 in view of US 6067306. One of ordinary skill in the art would have found obvious to use a processor programmed with an algorithm providing feedback timing control as shown by US 6067306 with the system as claim in the Application No. 10/012,002 for the purpose of partially reducing energy variations making said device more stable and reliable since a control processor is programmed with an algorithm for generating small charging voltage dithers to produce feedback

responses from which trigger timing can be controlled to maintain laser operation within desired ranges of laser efficiency and/or beam quality as shown by Knowles et al.

This is a provisional obviousness-type double patenting rejection.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claim 27 is rejected under 35 U.S.C. 102(a) as being anticipated by Smart (6,281,471, B1).

Regarding claim 27 Smart discloses a process for controlling discharge timing of a burst of pulses produces by a MOPA laser system comprising the steps determining the timing of discharge to produce said pulse based on feedback discharge timing signal wherein at least a first set of discharge at start of said burst of pulses are programmed to occur at relative times so that no significant lasing results as a consequences of the discharge (Column 14, Lines 35 – 61, Column 17, Lines 60 – 68, Column 18, Lines 1 – 11, 65 – 68, and Column 19, Lines 1 – 24.
